Active Securities

Stocks

[By The Associated Press]

Wall Street, December 27.

Trading in securities differed in no important essential from the preceding session, except that dealings embraced a larger number of issues, with greater uniformity of tone. European conditions seemed to exert little direct influence, but Mexican affairs contributed to the reactionary tendencies of stocks whose interests are bound up in the destinies of that country.

Absence of public inquiry, except in some of the investment stocks, tended greatly to curtail operations. Business during the intermediate session was attended by frequent intervals of absolute apathy, with occasional bear attacks upon the more volatile specialties, particularly motors and allied issues.

Mercantile Marines, weak features of the previous day, hardened visibly on circumstantial reports that England's proposed control over shipping would not necessarily imply any change in the probable dividend action of the company. Other shipping stocks were strong, Atlantic, Gulf and West Indies adding at its best quotation 4½ points to yesterday's substantial gain.

Bulls suffered from further neglect during the forenoon, but strengthened later, Union Pacific, New York Central, Southern Railway and Rock Island leading that division. Prices receded generally toward the close.

Total sales of stocks Wednesday, 15,500 shares, against 77,800 Tuesday, 15,800 a week ago and 390,100 a year ago. From January 1 to date, 230,871,400 shares, against 175,363,900 a year ago. All quotations in dollars.
